Fence: 290 x 450 x 105 cm (l x w x h)

- Hutch with a threshold, 6-part fence, 10 bucket rings and hoisting rings.

The hutches are made in top quality polyester and patented fencing. Glassfibre-reinforced polyester has a number of qualities, which makes this material very suitable for producing this housing system. The material is extremely strong and sustainable. A life of thirty years is quite normal. Another strong point of this polyester is that it is resistant to UV. A hutch effectively keeps solar heat outside, also because the smooth, extremely white top layer reflects sunlight. Even with great heat it remains cool in a calf hutch! In addition, the openings created at the front of the roof guarantee the flow of fresh air.
